  - Sound attenuated enclosure ensures quiet operation and protection against mother nature. Three panels are removable for easy service and maintenance access.
- **Enclosed critical grade muffler**
  - Quiet, critical grade muffler is mounted inside the unit to prevent injuries.
- **Small, compact, attractive**
  - Makes for an easy, eye appealing installation, as close as 18" away from a building.*

## Installation System
- **1 ft (305 mm) flexible fuel line connector**
  - Absorbs any generator vibration when connected to rigid pipe.
- **Composite mounting pads**
  - Eliminates the need to pour a concrete pad unless required by local municipalities.
**Sound levels are taken from the front of the generator. Sound levels taken from other sides of the generator may be higher depending on installation parameters.**

**Rating definitions - Standby:** Applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. (All ratings in accordance with BS5514, ISO3046 and DIN6271).

- Maximum wattage and current are subject to and limited by such factors as fuel Btu/megajoule content, ambient temperature, altitude, engine power and condition, etc. Maximum power decreases about 3.5 percent for each 1,000 feet (304.8 meters) above sea level; and also will decrease about 1 percent for each 6 °C (10 °F) above 16 °C (60 °F).
